Andre Holloway built his life on power, loyalty, and choices that leave no room for mistakes.

In Richmond's streets, Andre has everything a man in his world could want: money, respect, family, and Zariah King, the woman who has stood beside him through it all. But the deeper Andre sinks into the life he's created, the higher the price becomes for everyone he loves.

When betrayal strikes, everything begins to unravel. Love becomes complicated. Loyalty becomes dangerous. And one devastating night changes the course of Andre's life forever.

Andre must decide whether the man he's always been is the man he's willing to remain. But redemption doesn't erase consequences. Some choices leave scars too deep to bury.

A gripping story of love, betrayal, and redemption, The Life He Thought He Buried asks what happens when the life you built becomes the very thing that destroys everything you love.
